

## **Is my fish Male or Female?**

**I have 3 tiger barbs in my 10 gallon tank, I am wondering if there is any way of distinguishing male from female, if so, how? can you please help me?**

You are asking how to Sex fish. This is difficult in many cases but for Tiger Barbs it is a little easier. Males tend to be more colorful overall with a brighter red in the dorsal fins as well. Females tend to be wider and generally larger then the male with less vibrant coloration.
